Spivi noun: An immersive fitness gamification platform that helps gym operators achieve better retention and loyalty by utilizing existing wearables, equipment, and sensors in the club.

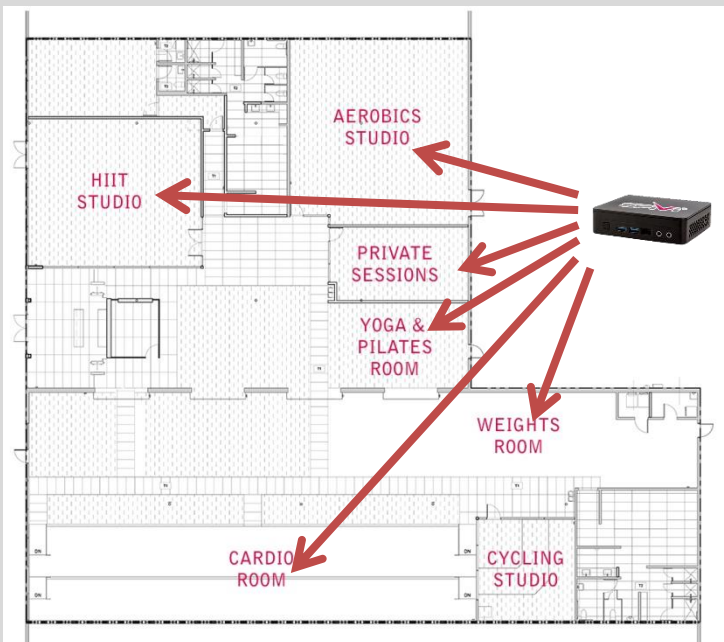

Compatible with most wearables and smartwatches, including Apple and Samsung watches, Spivi Arena is an easy-to-implement, robust Heart Rate Tracking system for fitness facilities.

Spivi Arena was built for all kind of workouts, it's a heart-rate tracking system on steroids. It reads your members' heart rate data directly from their wearables, combines the data with personal information it has on the cloud such as age, weight and performance history it has on record, and generates different views including color coded views, a leaderboard with respect to LTHR, %Max HR data, burned calories and more.

SPIVI ARENA ZERO MAINTENANCE

- Customer Support** - Global

SPIVI ARENA IN YOUR FACILITY

SPIVI ARENA

The System

Gamified Experience - Ranking, badges, unlimited fitness challenges, live feedback, post-class analysis, and auto-emails.

Loyalty Driven by Data - Driving retention and loyalty through metrics, leaderboards, and gamification.

Dynamic Leaderboard - Many options and attributes to select from: Profile Photo, Name, Heart Rate BPM, %Max Heart Rate, %LTHR, Calories, Spivi® Points and Rank.

Color Coded Views - Equalize everybody to their fitness levels, train with %MHR or %LTHR.

Spivi Replay® - Run Classes for in studio at home members live or on-demand.

Fitness Challenges - Challenge your class for calories and points.

Fitness Tests - Built-in MHR and LTHR tests.

Members' Profiles - Members information, profile settings, privacy settings and performance history, are all available for your members on-line and on the move. No need of any 3rd party service.

Data Collection - High-resolution data collection and more information on each workout. Per-second graphs, heart rate histograms, heart rate zones and more are available.

Mobile App - Members can view, book, change mats and pay for classes and review their workouts, challenges results and their reward points.

Per Mat Booking - Included scheduler web widget with a built-in integration with MINDBODY® and other CRM platform to provide per mat booking on your website.

SPIVI ARENA SETUP MODES

Gym Mode - Members can join either by using the app on their mobile phones or just by wearing their HR monitors. When in Gym Mode, the system starts monitoring everybody as soon as they enter the room.

Class Mode - Monitor group-x, HIIT, kick-boxing and any other aerobic or cardio classes.

SPIVI ARENA COMPATIBILITY

Spivi Arena is compatible with any ANT+ HR Monitor, Apple Watch, Samsung Watch, Wear OS 3.0, as well as the Polar H7, H10 and OH1 wearables.
